BOGER & BENZ SERVICE

TURNING OLD INTO ... AS GOOD AS NEWLY MADE*

Every tool wears out. Eventually, it will be unfit for use. The BOGER & BENZ service stands for successfully turning old into as good as new: Our team in the tool sharpening department returns solid carbide tools to their original quality and geometry and to the sharpness and contour required.

This also applies to new and re-coating in collaboration with renowned coating companies. Thanks to our optimally equipped machine facilities and highly efficient QA, we can implement individual requirements and all usual quality and precision standards when resharpening. And this we guarantee.

*Empirical value for resharpened/ recoated tools: 5 % less life distance than in new tools on average.

Our scope of services varies depending on the state of the tools to be resharpened, their number and the tasks required. We will be pleased to provide you with a binding offer for resharpening, recoating or our B&B service for your tools upon request.
